# BUILDING STRONG SAFER COMMUNITIES

Building Stronger Safer Communities (BSSC) is a 2 year project in which ARA will work with identified Culturally and Linguistically Diverse (CALD)/New and Emerging Communities (NEC) and allied organisations to provide tailored community education workshops around Family and Domestic Violence (FDV). From those workshops, in-depth training will be provided for identified Community Educators to equip them with the knowledge and resources to respond appropriately to FDV within their communities.

## PROJECT AIMS

- To improve community understanding of FDV.
- Develop and improve Community Educators skills and knowledge to effectively respond to FDV.
- Facilitate and improve Community Educators connection with FDV specific services, and improve referral pathways.
- Work towards reducing incidences of violence against women and children within CALD/NEC communities.
